(1) Microsoft Internet Explorer v. 6.0, Released at least as early as August 2001

In Figure 1 below, Microsoft® Internet Explorer v. 6 is shown to include a plurality of identifiers adjacent to a window in which content may be browsed. The identifiers may be used to access previously stored links to content.

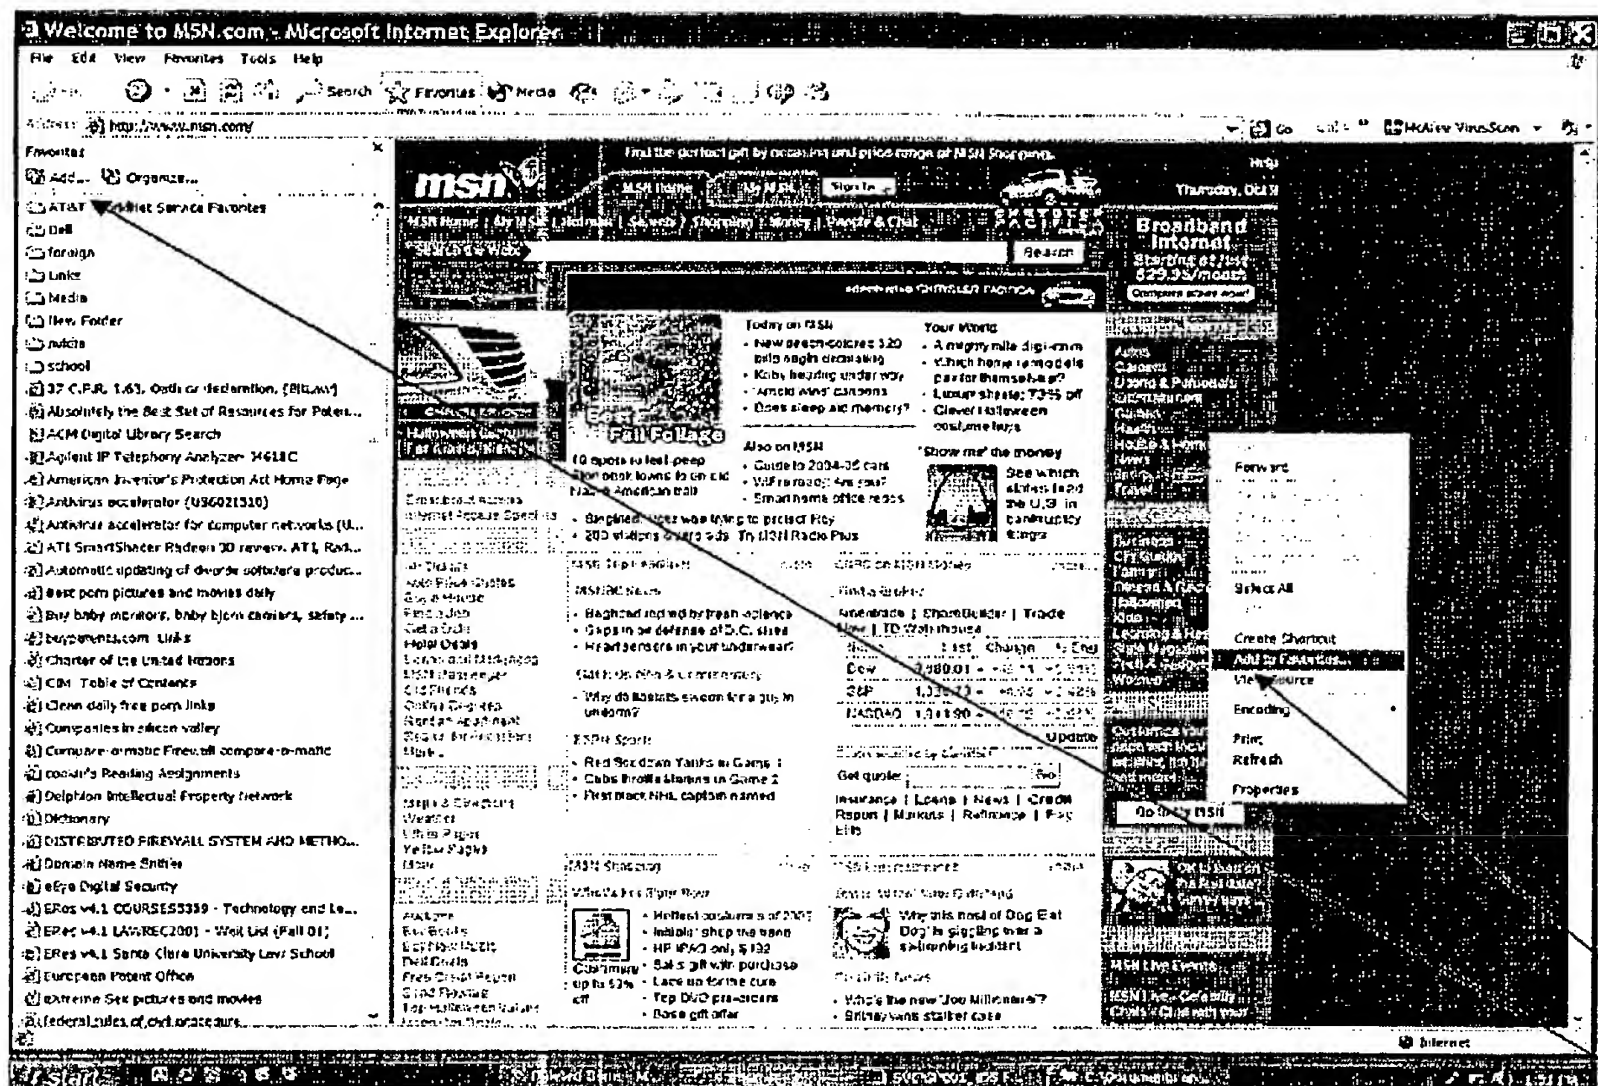

Figure 1

In order to store content that is currently displayed, however, one must select an "add to favorites" selection. See Figure 1, for example.

In response to such selection, a plurality of available identifiers is displayed for allowing a user to select one of the identifiers, in association with which the content may be organized. See Figure 2. So that the content itself is stored (and not just a link thereto), a "Make available offline" option may also be selected. Again, see Figure 2.

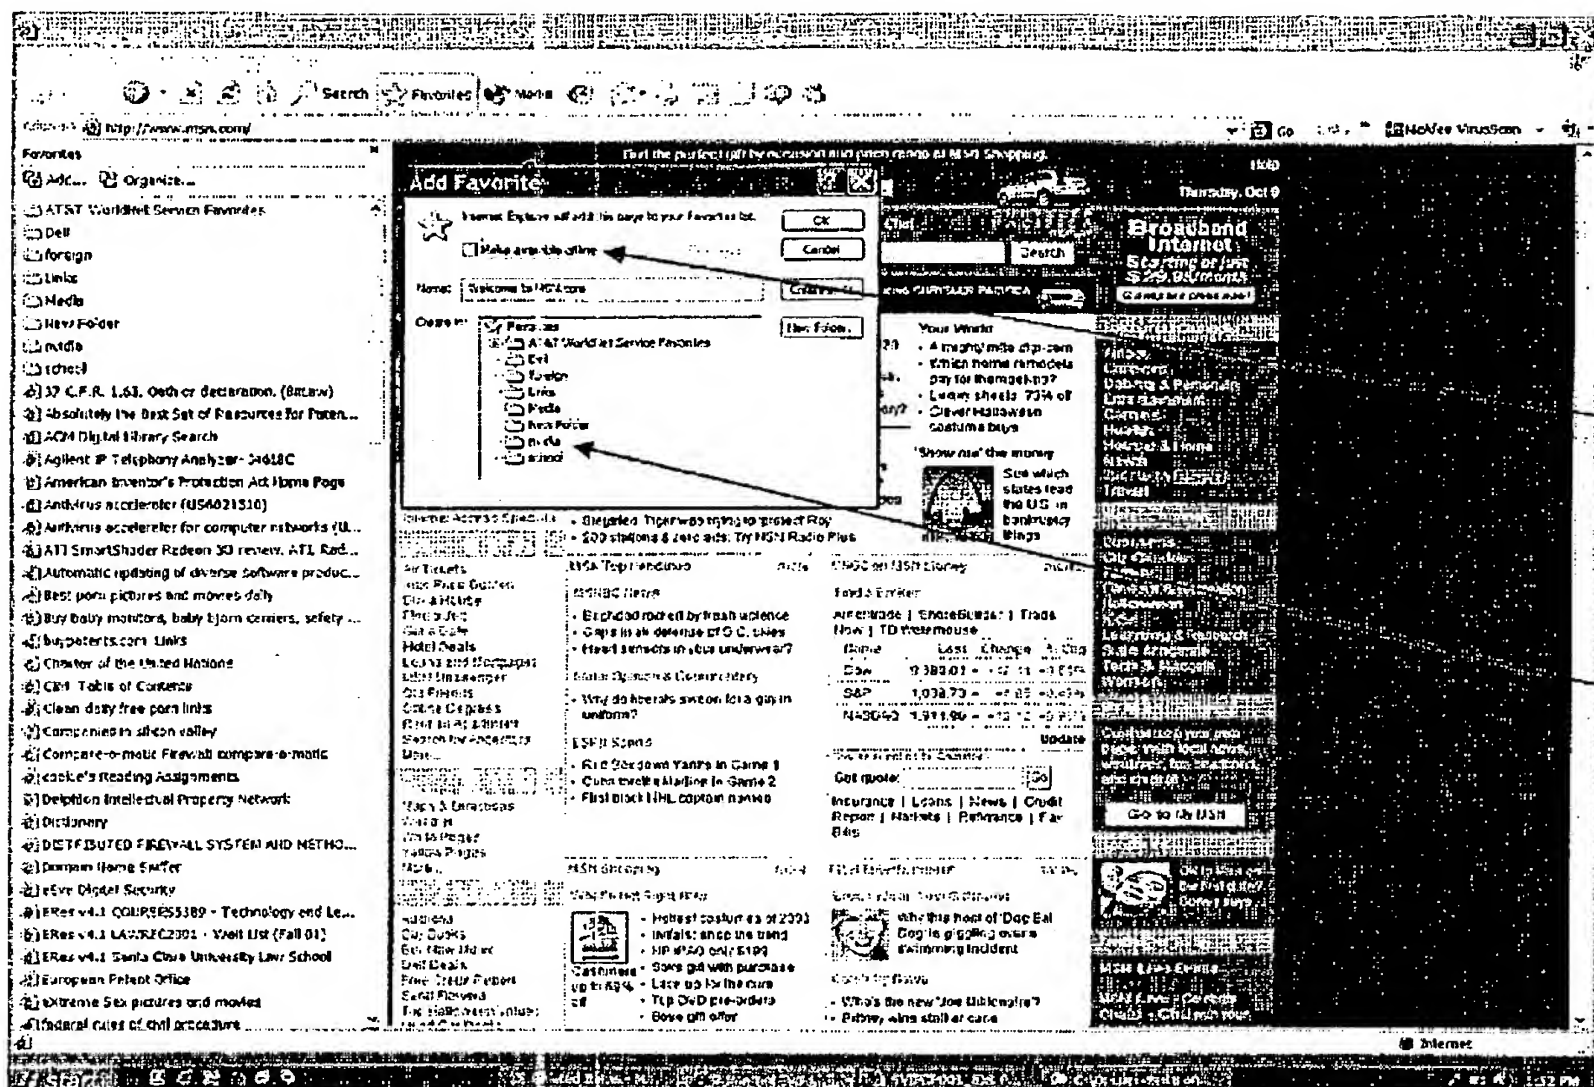

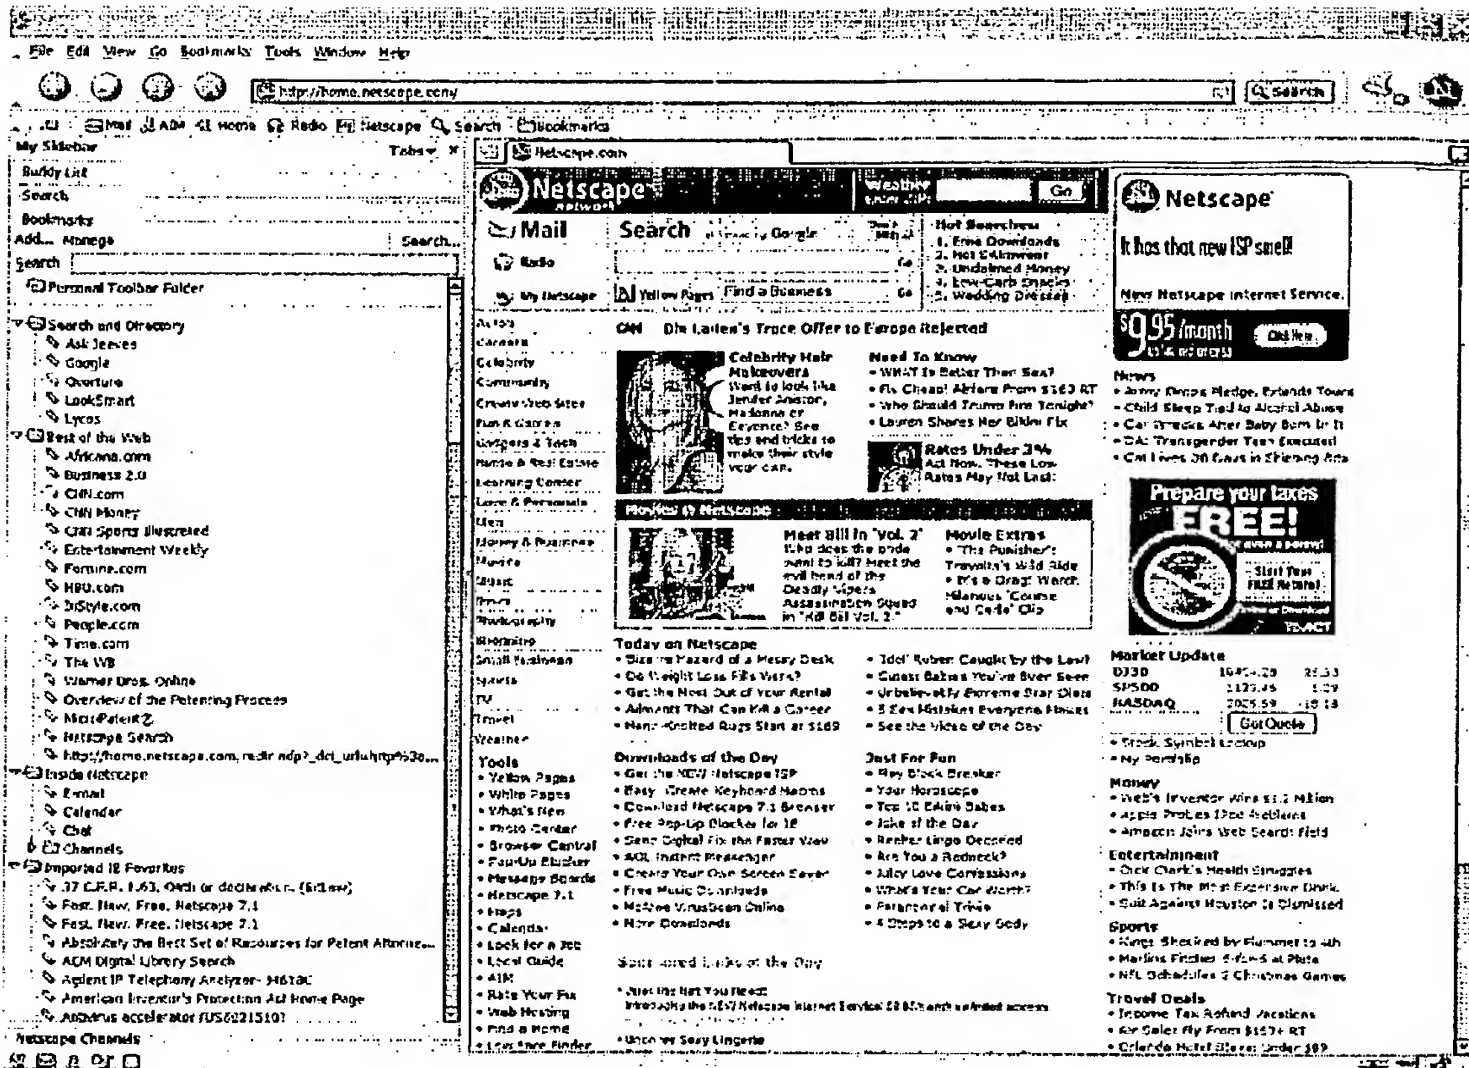

Figure 2

Thus, when a user wants to browse a network and store network content in association with one particular identifier, the user must "post-select" (i.e. select afterwards) the desired identifier using a menu (again, see Figure 2), for content to be stored in association with one particular identifier. Moreover, a "Make available off-line" option must be enabled.

(2) Netscape Navigator v. 6.1, Released at least as early as June 2001

This Information Disclosure Statement is not to be necessarily construed as a representation that additional information material to the examination of this application does not exist, or that this information indeed constitute prior art.

BEST AVAILABLE COPY

This Information Disclosure Statement is believed to be filed before the mailing date of a first Office Action on the merits. Accordingly, it is believed that no fees are due in connection with the filing of this Information Disclosure Statement. However, if it is determined that any fees are due, the Commissioner is hereby authorized to charge such fees to Deposit Account 50-1351 (Order No. SVIPGP004).
